SUMMARY

I am a motivated ITM student with a strong interest in technology and business. I have basic knowledge of computers, data handling, and communication. I am a quick learner, hardworking, and ready to take responsibility. I am looking for an opportunity where I can gain practical experience, improve my skills, and contribute positively to the organization.

TECHNICAL SKILLS

Programming Languages: Basic Python, C language, core Java
Web Devlopment: HTML, CSS, JS
Tools: Visual Studio Code, Sublime Text

PROJECTS

Petrol Pump Billing System Aug 2026–Present
C Programming | Console-Based Application

- Developed a C-based petrol pump billing system for managing fuel sales and generating detailed receipts.
- Implemented Petrol/Diesel selection, quantity-based billing, GST, and discount calculation.
- Added Cash, Card, and UPI payment options with transaction status.
- Added loyalty points, special offers, and file handling to save generated receipts.

Student Management System Aug 2026–Present
Java | OOP

- Developed a console-based Student Management System using Java.
- Implemented features to add, view, search, update, and delete student records.
- Implemented input validation and menu-driven functionality for easy user interaction.
- Managed student details such as student ID, name, course, branch, and contact information.

Library Management System Aug 2026–Present
C Programming | Data Structures

- Developed a console-based Library Management System using C and Data Structures.
- Implemented arrays, linear search, binary search, and sorting to manage and retrieve book records.
- Implemented a student linked list for managing student information.
- Used Stack for managing book return operations.
